Frontend Engineering

3 achievements

Connect the parts of your system

The work collected under “Frontend Engineering” shows one part of a working system. We can help connect that part to the rest of your operation. A site that is quick, findable and editable by your own staff, without a bill for every change of wording.

Find a comparable challenge

Follow an example that resembles your situation. Its review describes the decisions behind the result, beyond the technology label. Generated 495 pages from a SQLite export — 495 achievement pages generated from a read-only export

Generated 495 pages from a SQLite export Get in touch →

A maritime platform with clear system boundaries

Architected a layered maritime platform separating a Next.js PWA frontend, a Go (Huma/Fiber) API, and a PostgreSQL function layer, keeping all business logic in the database.

Generated 495 pages from a SQLite export

Generated 495 achievement pages across three languages from a read-only SQLite export, with the page address authored as data so that correcting a sentence no longer moved the page and broke the link.

Replaced 963 metadata blocks with one graph

Replaced 963 anonymous structured-data blocks that restated the company 1,671 times with one linked graph of 16 types minted from stable origin identifiers.

Focus the engineering effort

Describe the workflow, the existing interfaces and the users who need the change. We can define a testable delivery and a handover that lets your team maintain it.
