Engineer Data

{ Infrastructure as Code }

Servers you can rebuild from versioned configuration

The whole setup written down as files, so it can be recreated exactly and never lives only in one person's head.

Still working out what you need?

Tell us what is going wrong, or what you are trying to build. We will tell you what it would take, roughly what it would cost, and whether we are the right people for it.

From 1,400 DKK an hour, excluding VAT — and less per hour on a longer booking.

Turn the service into a result

Make “Infrastructure as Code” serve a business outcome. We can connect the technical work to the users, operations and decisions it needs to support. The whole setup written down as files, so it can be recreated exactly and never lives only in one person's head.

Examine the relevant work

Use the related work on this page to examine our approach. Ask about the tradeoffs and the conditions behind each result. Wrote 1,000 RBAC rules to secure Linux servers — 1,000 access rules written to close a security gap

Wrote 1,000 RBAC rules to secure Linux servers Get in touch →

Wrote 1,000 RBAC rules to secure Linux servers

Enhanced data security by implementing 1,000 RBAC rules for developers, application instances, PostgreSQL, MS SQL, and other Linux servers, preventing unauthorized access; documented with Ansible automation.

Implemented backups and disaster recovery as code

Configured database backup retention as infrastructure-as-code, then audited the recovery position and documented the restore procedure — naming the remaining gaps rather than leaving them to be found during an incident.

Looking for Infrastructure as Code?

Use the linked work to judge relevant experience. Tell us what you need to build; we can discuss the scope, delivery approach and handover.
